How to Succeed in Your Pre-Health Coursework

Wednesday, Sept 23 at 2pm
Wyatt 201

If you’ve heard the rumors that general chemistry and calculus are tough, they’re true. But you can be successful!

Meet with representatives from the Department of Mathematics, current pre-med students, Tutoring Services, and the PCC. We even have a real-live medical student panelist! A brief presentation of evidence- and experience-based recommended practices (aka- how to study) will be followed by the opportunity to ask questions of the panelists.

Registration for this event is encouraged, but not required.
