### ***Additional Research Experience***

Statistical Consultant, The Pew Charitable Trusts, Washington D.C., July 2010 – September 2010

The work for the Pew Charitable Trusts involved drafting a memorandum that provided an overview of different methods of estimating mean length of stay. It examined the strengths and weaknesses of the most widely used approaches to assessing the average length of stay in prison and proposed the most appropriate method of measuring length of stay at the state level, by offense and category over time. The memo also included description of data needed to accomplish the tasks.

Statistical Consultant, The Sentencing Project, Washington D.C., May 2005 – August 2006

Responsible for developing a report that examined time served in prisons. Utilized several data sets from the Bureau of Justice Statistics to program modules and create graphs in SAS.

Research Assistant, Centers for Disease Control and Prevention, Atlanta, GA, 2001-2003

Conducted an analysis that examined prenatal syphilis and HIV screening rates in addition to an analysis that looked at levels of sexually transmitted infections in the Medicare population [over the course of three summers].

Research Assistant, Department of Sociology, Rice University, September 2000 – May 2002

Used SAS routines to examine the impact of immigration legislative changes on the method Mexican migrants chose to enter the United States.
